## PROJECTS

**Social Media Dashboard** | Website | Source Code

JAVASCRIPTS | SASS | GULP

- Developed a responsive social media analytics dashboard with a dynamic Dark Mode to Light Mode switch, enhancing user experience, accessibility, and customization.
- Streamlined CSS development using SASS for improved project maintainability and scalability; enhanced user experience through automated theme preference detection and local storage integration in JavaScript.

**Insure Landing Page** | Website | Source Code

REACT | BOOTSTRAP

- Leveraged React-Bootstrap to craft an insurance landing page with a strong focus on responsive design, ensuring flawless user experiences across all devices, meticulously fine-tuning visual elements for consistency.
- Demonstrated adept problem-solving skills in overcoming navbar design challenges, such as implementing off-canvas functionality, while adhering to style guidelines, resulting in a sleek and functional navigation experience.

**Developer Portfolio** | Website | Source Code

REACT | TAILWIND | VITE

- Crafted a standout portfolio website with React, Tailwind CSS, and Vite, offering seamless dark/light mode toggling for personalized experiences.
- Enhanced user experience with a fixed navbar that adapts for desktops and mobiles, along with dynamic animations and the shancn accordion component for an engaging and visually appealing browsing experience.
